Backend and Database

Node.js, Flask, SQLite, MongoDB, MySQL

Concepts

Object Oriented Programming, Android Development, Web Development, Software Testing

Tools

Git, Docker,

Miscellaneous

WebSocket, Docker, Pandas, TensorFlow, Pytest, GCP, AWS

PROJECTS

Current Project: Chat-with-pdf(SaaS Platform)

[Link to the project](#)

Technologies: Next.js, Tailwind CSS, LangChain, Pinecone, Firebase, clerk, DaisyUI

- Developing a scalable SaaS platform focused on providing management tools,
- Implementing core functionalities including user authentication, dashboards, CRUD operations, subscription management, notifications, API integration, responsive design, and real-time updates.

MY PORTFOLIO

[Link to the Project](#)

Define Hub

[Link to the Project](#)

Define Hub is a dictionary web app built with React and styled using Tailwind CSS. It provides users with quick and easy word definitions, combining a responsive design with fast, intuitive functionality for seamless word lookup experiences.
